## Fuel your passion for life

Energy Enhancer patches induce beta-oxidation to burn fat and convert it to vital energy.

### How to use

- Apply the patch to clean dry skin in the morning. **White patch on the right, tan one on the left**
- Wear patch continuously for approximately 12 hours before removing and discarding.
- Stay well hydrated.

### How it works

The non-transdermal patch contains a mesh lattice made of organic materials that reflect your body heat in the form of a precisely modulated low level infrared light.

Various wavelengths of light are reflected back into the body which signal the body to activate a specific peptide occurring naturally in the body. This enables the body to revert to a more youthful state through cellular regeneration, energy flow and other restorative changes.
