

CARNOSINE

**STRENGTH
FLEXIBILITY
AND CLARITY**

What it does

- Supports **improved circulation**
- Improves **cognitive function**
- Improves flexibility and balance
- Improves strength and endurance
- Reduces lactic acid build-up
- Supports adrenal and thyroid function
- Improves pancreas and liver function
- Reduces cardiac stress
- Increases alanine for performance
- Increases hisdidine for repair

THE GAMECHANGER TEAM
just stick it

Lead the way

Y-Age Carnosine elevates the production of carnosine, a naturally occurring amino acid with antioxidant properties. It improves flexibility, strength, and balance. It produces a significant improvement in physiologic function and mental acuity.

How to use

- Apply the patch to clean dry skin.
- Wear patch continuously for approximately 12 hours before removing and discarding.
- Stay well hydrated.

How it works

The non-transdermal patch contains a mesh lattice made of organic materials that reflect your body heat in the form of a precisely modulated low level infrared light.

Various wavelengths of light are reflected back into the body which signal the body to activate a specific peptide occurring naturally in the body. This enables the body to revert to a more youthful state through cellular regeneration, energy flow and other restorative changes.
