Get back in control

SP6 Complete balances your appetite and reduces cravings along with easing addictive tendencies. It improves overall hormonal balance and the functional state of the organs.

How to use

- Apply the patch to clean dry skin on **left side of the body**.
- Wear patch continuously for approximately 12 hours before removing and discarding.
- Stay well hydrated.

How it works

The non-transdermal patch contains a mesh lattice made of organic materials that reflect your body heat in the form of a precisely modulated low level infrared light.

Various wavelengths of light are reflected back into the body which signal the body to activate a specific peptide occurring naturally in the body. This enables the body to revert to a more youthful state through cellular regeneration, energy flow and other restorative changes.
